

assignment #13 – review

Write a 2-page review of one of your classmates' montage projects — projects will be assigned in class; download it from the homework folder to view and review :

Your review must be 2 full pages, typed, double-spaced, 11-pt font, 1-inch margins.

Your classmate's grade will not be affected by your review; you are being graded on the originality, thoughtfulness, and clarity of your review.

Your review should address all of the following eight questions, especially the *Whys*:

- 1) Is the author's passion — what it is — clear? Why or why not?
- 2) Do you get a strong sense of why they are passionate about it? Why or why not?
- 3) How are the imagery and sound related to each other? Do they work together or in opposition?
- 4) How are the imagery and sound related to the editing choices? Do they work together or in opposition?
- 5) How is the production value? Is it well-crafted? Does it demonstrate effort?
- 6) How creative is their approach? Do you see/hear an original voice and original vision?
- 7) What are the strongest elements or moments? Why?
- 8) What are the weakest elements or moments? Why?

The review is due at the beginning of the next class (after Spring Break).
